

# REFERENDUM FOR AN INDEPENDENT SCOTLAND POLL

*Published 8<sup>th</sup> October 2012*

In August 2007, the SNP published a white paper on Scotland's future, containing the bill which would authorise a referendum on Scottish independence and setting out a proposed ballot paper. Since then, using our omnibus, Scottish Opinion Survey, TNS BMRB has conducted a series of polls to establish how the Scottish electorate would respond to the two options specified if such a referendum were to be held 'tomorrow'.

Although the SNP have proposed an alternative form of question, we have retained the original question for purposes of trend data and measuring change in attitudes. This poll is the latest in this series, and was published in The Herald on 8<sup>th</sup> October 2012. It contains an additional question featuring a third option of additional powers for the Scottish Parliament within the United Kingdom, first asked in October 2011.

TNS BMRB is a member of the British Polling Council (BPC) and abides by its rules. We also operate within the Code of Conduct of the Market Research Society (MRS). In accordance with these rules the following information is provided:

<b>Sample size</b>	995
<b>Sampling points</b>	70 Scottish parliament constituencies
<b>Fieldwork dates</b>	26 <sup>th</sup> September – 4 <sup>th</sup> October 2012
<b>Interview method</b>	Face-to-face, in-home
<b>Population sampled</b>	All adults aged 18+ in Scotland
<b>Sampling method</b>	The poll was conducted through our Omnibus, Scottish Opinion Survey. For this survey, sampling points are selected to be representative of Scotland demographically and geographically. Within each sampling point, a quota sampling method is used for respondent selection.
<b>Data weighting</b>	Data is weighted to the profile of all adults aged 18+ in Scotland, based on population profile estimates from the BARB (Broadcasters' Audience Research Board) Establishment Survey 2 Years Ending December 2008 and the 2001 Census. Weighting is carried out in relation to working status within gender, age, social grade and electoral region. Unweighted and weighted bases are shown at the top of each data table.
<b>Questions</b>	The data tables show the question wording in full
